

Subject: Internal shape change of micro-switches AMS-7B and AMS-7B01

1. Products affected:

AMS-7B and AMS-7B01

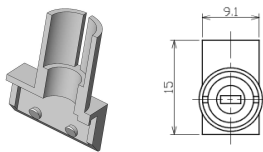

2. Description of the change/Reason for the change

The inner shape of the grip will be changed in order to prevent air bubbles in the resin and to equalize the thickness. (The external form remains the same)

※ Specification will not be revised as this is only an internal shape change.

3. Effect on products as a result of the change

No effect or changes to product specifications, environment, materials, and product model.

4. Schedule for change

This change will come into effect as soon as current stock is depleted.

(Estimated schedule for change: August 2014 delivery onwards).

Old and new model will not be combined in future orders. Please be aware that once the new product has been supplied we will not be able to provide the previous model for later orders.

5. Other

If you have any concerns regarding this change, please contact our office by June 6<sup>th</sup>, 2014. Non-contact will be understood as acceptance of the change.

Thank you for your understanding in this matter.
