FAX: 03-3860-8660

Subject: Product Classification Integration

Unfortunately, we are going to change the below “Changing schedule” because of the circumstance of certification organization.

So please refer to the updated shedule written in the below “Changing schedule” .

1. Reason for integration

For improvement of production efficiency by decreasing the production number.

2. Contents

■Intensiveness of old product name to current name

We implement decreasing the production number by intensiving old product name to current name.

※Please refer to the below HP about the product name change.

<https://www.hinodedenki.co.jp/en/images/pdf/compare202203.pdf>

■Integration of product name notation of certification products

We currently append “UL” or “TC” at the end of product name in the label.

By this changing, we stop appending them at the end of product name and print the logo mark of the certification which the products have in the label of product and box.

Please refer to product catalog about the certification acquisition status

※**The product in itself does not change.**

3. Changing schedule

- Last order : the end of Jan, 2022
- Last shipment: the end of Apr, 2022

- Last order of old products name : the end of Mar, 2022
- Start of new products name order : the beginning of Apr, 2022
- Start of new products name shipment : the beginning of May, 2022
- Last shipment of old products name: the end of Jul, 2022

4. About the specification and investigation documents

If you needed to change or issue them accompanied by this changing, you should contact to us by the end of Nov.

But even if you required them, we would not change the upper schedule.

5. Notice

If you required the schedule extension, you should contact to us by the end of Oct.

※If you did not contact to us, we judge that you approve of our information
